

18V/2A Sync. Step-Down Converter Evaluation Board

Parameters Subject to Change Without Notice

FEATURES

- 3.7V to 18V operating input range
2A output current
- Up to 95% efficiency
- High efficiency (>80%) at light load
- Fixed 800kHz Switching frequency
- Input under voltage lockout
- Start-up current run-away protection
- Over current protection and Hiccup
- Thermal protection
- Available in TSOT23-6 package

APPLICATIONS

- Distributed Power Systems
- Networking Systems
- FPGA, DSP, ASIC Power Supplies
- Green Electronics/ Appliances
- Notebook Computers

DESCRIPTION

The JW[®]5033T is a current mode monolithic buck voltage converter. Operating with an input range of 3.7V-18V, the JW5033T delivers 2A of continuous output current with two integrated N-Channel MOSFETs. At light loads, regulators operate in low frequency to maintain high efficiency and low output ripple.

The JW5033T guarantees robustness with short circuit protection, thermal protection, current run-away protection, and input under voltage lockout.

The JW5033T is available in a 6-pin TSOT23-6 package, which provides a compact solution with minimal external components.

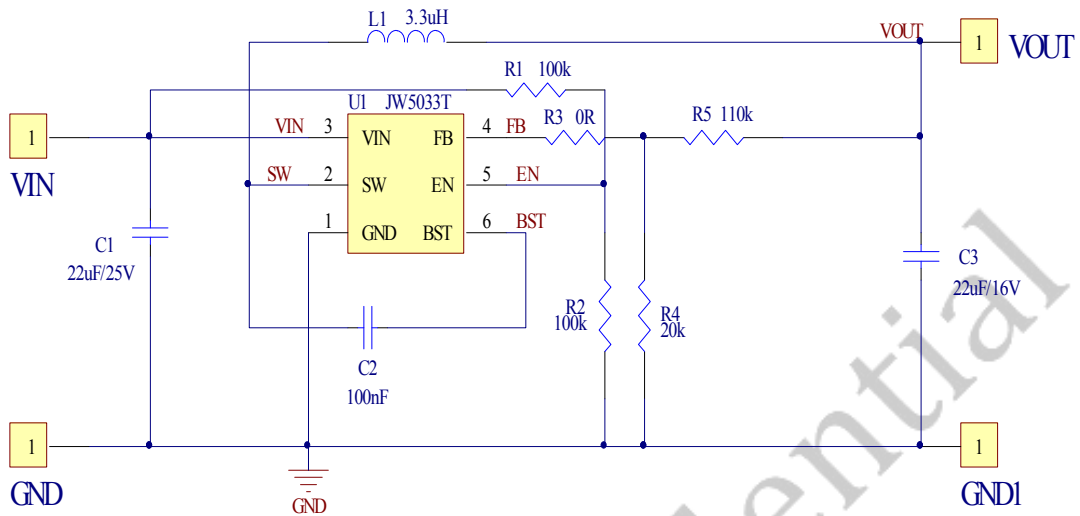

ELECTRICAL SPECIFICATIONS

Parameter	Symbol	Value	Unit
Input Voltage	VIN	6~18	V
Output Voltage	VOUT	5	V
Output Current	IOUT	0~2	A

QUICK START GUIDE

1. Connect the positive terminal and negative terminal of the load to Vout and GND of EVB, respectively.
2. Connect a power supply between VIN and GND with the supply in “OFF” state. Set the output voltage of the power supply to 6V~18V.
3. Turn on the power supply and the evaluation board starts operating in normal condition.
4. The output voltage can be adjusted by varying the R4 and R5 on EVB.
For example: Fixed R4 to 16K, when adjusting the output voltage to 3.3V,
 $R5 = V_{out} / 0.765 * R4 - R4$.
5. For more information, please refer to the datasheet of JW5033T
