DESCRIPTION

The JW[®]5222 is a current mode monolithic buck switching regulator. Operating with an input range of 2.5V-6V, the JW5222 delivers 2.5A of continuous output current with integrated P-Channel and N-Channel MOSFETs. The internal synchronous power switches provide high efficiency. At light loads, the regulator operates in low frequency to maintain high efficiency and low output ripples. Current mode control provides tight load transient response and cycle-by-cycle current limit.

The JW5222 guarantees robustness with hiccup output short-circuit protection, FB short-circuit protection, start-up current run-away protection, input under voltage lockout and hot-plug in protection, and thermal protection.

The JW5222 provides output power good indication which is only available in SOT23-6 package.

The JW5222 is available in 5-pin SOT23-5 or 6-pin SOT23-6 package, which provides a compact solution with minimal external components.

Company's Logo is Protected, "JW" and "JOULWATT" are Registered Trademarks of JoulWatt technology Inc.

FEATURES

- 2.5V to 6V operating input range
- Up to 2.5A output current
- Up to 94% peak efficiency
- High efficiency at light load
- Internal Soft-Start
- 1MHz switching frequency
- Input under voltage lockout
- Hot-plug in protection
- Short circuit protection
- Thermal protection
- Output POK indication (available in SOT23-6 package)
- RoHS Compliant and Halogen Free
- Available in SOT23-5/SOT23-6 package

APPLICATIONS

- 5V or 3.3V Point of Load Conversion
- Set Top Boxes
- Telecom/Networking Systems
- Storage Equipment
- GPU/DDR Power Supply

TYPICAL APPLICATION
