## DESCRIPTION

The JW<sup>®</sup>1130H is a current mode monolithic LED driver. The LED current can be controlled with an analog input voltage.

With high-side LED current sensing, the JW1130H can be configured as buck, boost or buck-boost topology to serve different LED driver need.

The integrated 44V/2A N-Channel MOSFETs ensures high efficiency operation.

At light loads, JW1130H operates in low frequency to maintain high efficiency and low output ripple.

The overvoltage lockout protection on SW pin protects JW1130H from open LED fault.

JW1130H also has thermal protection at 140°C.

The JW1130H is available in a 6-pin SOT23-6 and a 8-pin ESOP8 package, which provides a compact solution with minimal external components.

*Company's Logo is Protected, "JW" and "JOULWATT" are Registered Trademarks of JoulWatt technology Inc.*

## FEATURES

- 4.6V to 44V operating input range
- 2A peak switch current
- Analog dimming and PWM dimming
- Constant off-time operation
- SW over voltage lockout
- Thermal protection
- Available in SOT23-6 and ESOP8 package

## APPLICATIONS

- LED Driver

## TYPICAL APPLICATION
